

How to use the online tools to make batch queries in the EPPO Global Database?

- Guidelines -

Contents

- [Registering on the EPPO Global Database \(new user\)](#)
- [Logging in \(already registered user\)](#)
- [Necessary tools are in your dashboard](#)
- [Batch query for a short list of names/EPPO Codes: use 'Quick search' button](#)
- [Batch query for a long list of names/EPPO Codes: use 'Excel' button](#)

In order to use the online tools that will allow you to make batch queries in the EPPO Global Database, the first step is to become a **registered user** of the database (**free and simple procedure**). Once you have created your account, you will just have to login when returning to Global Database and start your queries. These online tools are very simple to use and do not require any particular IT knowledge.

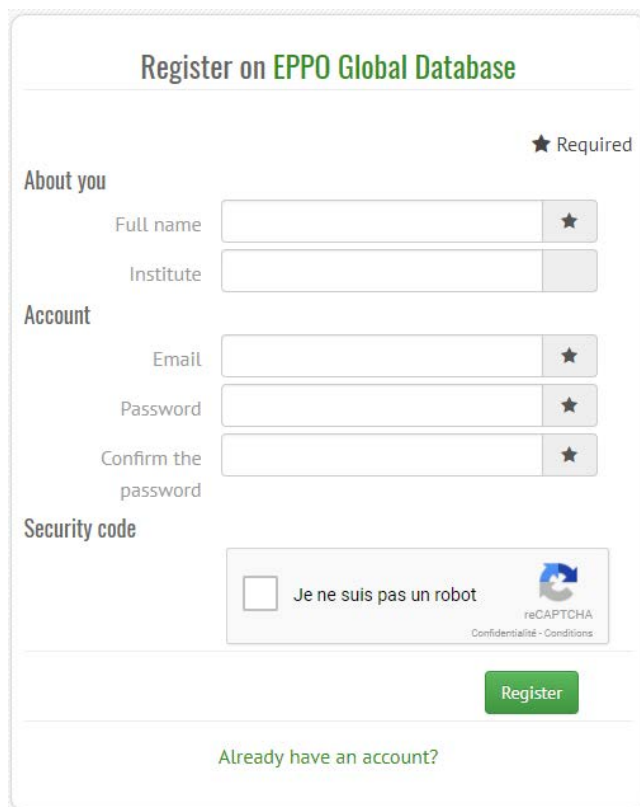

Registering on the EPPO Global Database (new user)

In order to register, please follow the following steps:

- Click on the 'register' button on the top right of the Database home screen.

- In the new page, please enter your details in the relevant fields.

The registration form is titled "Register on EPPO Global Database". It includes a "★ Required" indicator. The form is divided into three sections: "About you", "Account", and "Security code".

- About you:** Includes fields for "Full name" (required), "Institute", and "Email" (required).
- Account:** Includes fields for "Password" (required) and "Confirm the password" (required).
- Security code:** Includes a reCAPTCHA widget with the text "Je ne suis pas un robot" and "reCAPTCHA Confidentialité - Conditions".

A green "Register" button is located at the bottom right of the form. Below the form, there is a link: "Already have an account?".

- Once you have finished entering your personal details and password, simply click on the green 'register' button. You are now registered and will access the homepage associated with your profile (**dashboard**).

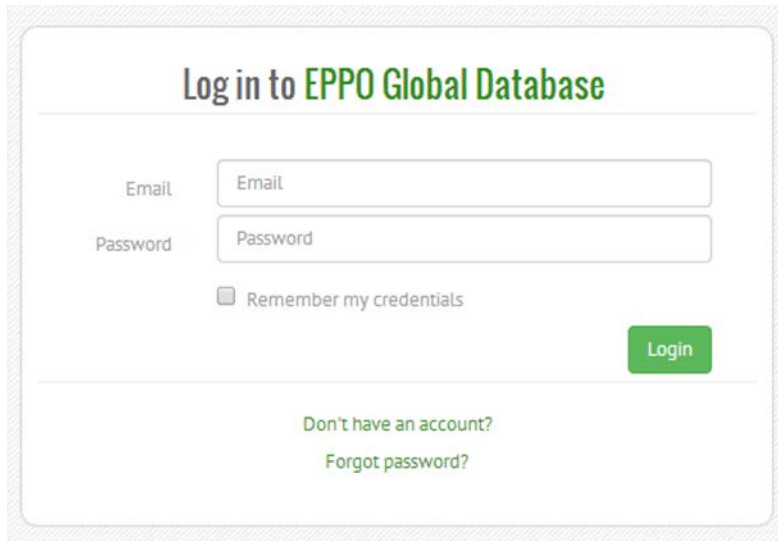

Logging in (already registered user)

You have already registered on EPPO Global Database and you want to start batch queries:

- click on the 'login' button on the top right of the Database home screen

- enter your email and password (if you wish, tick the box 'Remember my credentials' to be recognized automatically at your next visit).

A login form titled 'Log in to EPPO Global Database'. It contains two input fields: 'Email' and 'Password'. Below the 'Password' field is a checkbox labeled 'Remember my credentials'. A green 'Login' button is positioned to the right of the 'Remember my credentials' checkbox. At the bottom of the form, there are two links: 'Don't have an account?' and 'Forgot password?'.

If you have lost your password, click on 'Forgot password?' to receive an email with a link allowing you to reset your password.

Necessary tools are in your dashboard

On your dashboard, choose one of the 'Online tools' and follow the online instructions.

The screenshot shows the EPPO Global Database dashboard. At the top, there is a search bar with the text "Search by name or EPPO code..." and a "Go!" button. Below the search bar is a navigation menu with items: Home, Standards, Photos, Reporting Service, and Explore by. The main content area is titled "Dashboard" and contains several sections: "Last consulted pages", "Help us to collect photos" (with buttons for "View my submitted photos" and "Read the practical guide (PDF)"), "Request new EPPO codes" (with buttons for "Buy credits / view invoices" and "View my requests"), and "Online tools" (highlighted with a red box, containing buttons for "Excel..." and "Quick search..."). On the right side, there are sections for "About me" (with fields for Full name, Email, and Institute), "My account" (with options to change email, password, and personal information), and "Newsletters" (with a list of newsletters and a "Save" button).

This is a close-up of the "Online tools" section from the dashboard. It shows two buttons: "Excel..." and "Quick search...".

Batch query for a **long** list of names/codes.

Batch query for a **short** list of names/codes.

Batch query for a short list of names/EPPO Codes: use 'Quick search' button

If your batch query only contains a short list of names or Codes (one name/code per line), the quick search function can be used to:

- Get a preferred name from an EPPO Code
- Get an EPPO Code from a preferred scientific name
- Get an EPPO Code from a scientific name (preferred name or synonym)

The instructions are given online as follows:

- 1) Choose the function you need in the "Function" combobox.
- 2) Paste your short list of EPPO Codes or names in the box "Enter your text"
- 3) Click on the Process button.

Examples of quick searches:

Quick search

1) Choose the function you need in "Function" combobox.
2) Paste your short list of codes or names in the box "input text"
3) Click on the Process button.

Function
Get an EPPOCode from a preferred name (one name per line)

Enter your text (view example)

Cronartium coleosporioides
Endocronartium harknessii
Gymnosporangium juniperi-virginianae
Wrong name

Output result

Cronartium coleosporioides;CRONCL
Endocronartium harknessii;ENDCHA
Gymnosporangium Juniperi-virginianae;GYMINIV
Wrong name;****NOT FOUND****

Process

Back to dashboard

In this example, we have obtained a list of Codes from a list of preferred scientific names.

Quick search

1) Choose the function you need in "Function" combobox.
2) Paste your short list of codes or names in the box "input text"
3) Click on the Process button.

Function
Get a preferred name from an EPPOCode (one code per line)

Enter your text (view example)

BEMITA
SOLTU
CRYPMA
LYPES
3FRUC
WRONG CODE

Output result

BEMITA;Bemisia tabaci
SOLTU;Solanum tuberosum
CRYPMA;Sternochetus mangiferae
LYPES;Solanum lycopersicum
3FRUC;fruit crops
WRONG CODE;****NOT FOUND****

Process

Back to dashboard

In this example, we have obtained a list of preferred scientific names from a list of EPPO Codes.

Batch query for a long list of names/EPPO Codes: use 'Excel' button

If your batch query contains a long list of names or EPPO Codes, it is recommended to prepare this list in the format of an Excel file and to use the online tool 'Excel'.

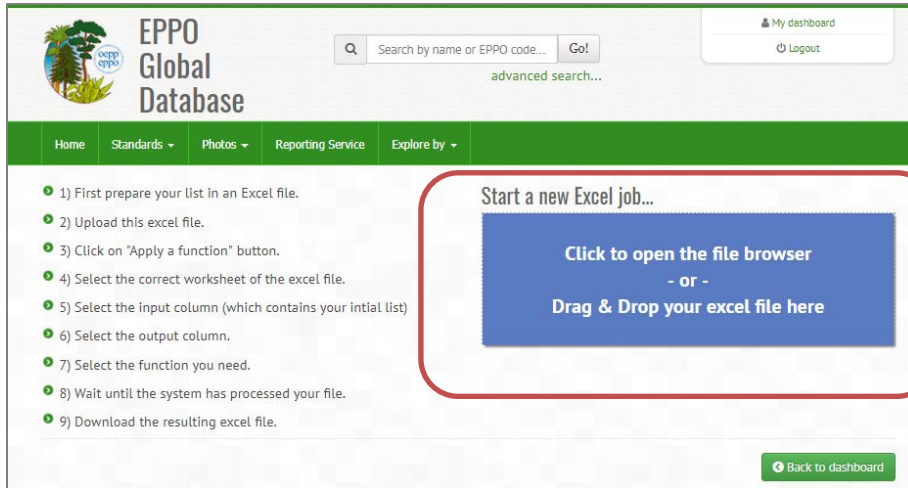

The instructions are given online as follows:

- 1) First prepare your list in an Excel file.
- 2) Upload this Excel file.
- 3) Click on 'Apply a function' button.
- 4) Select the appropriate worksheet within the Excel file.
- 5) Select the input column (which contains your initial list)
- 6) Select the output column.
- 7) Select the function you need.
- 8) Wait until the system has processed your file (usually only a few seconds).
- 9) Download the resulting Excel file.

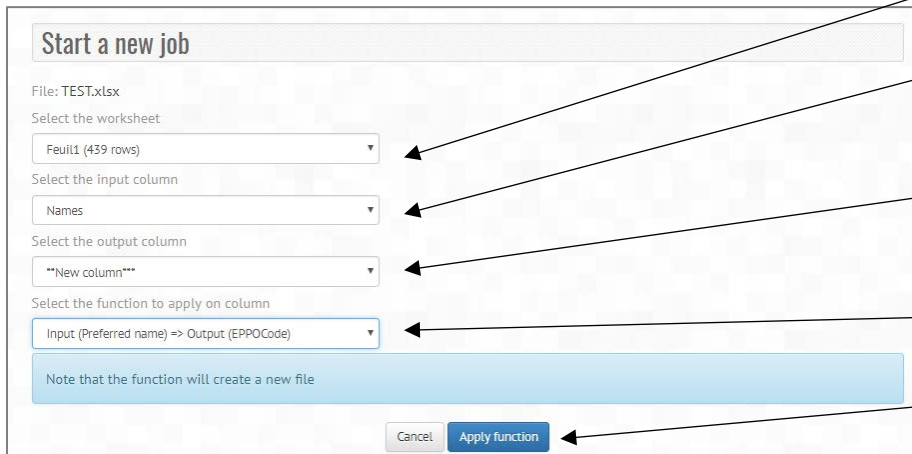

The following functions are available:

- Input a preferred name to get an EPPO Code
- Input a preferred name or a synonym to get an EPPO Code
- Input an EPPO Code to get a preferred name
- Input an EPPO Code to get synonyms and common names
- Input an EPPO Code to get the taxonomic position
- Input an EPPO Code to get a list of host plants (when additional information on this pest is available in the database)
- Input an EPPO Code to get the main category (when additional information on this pest is available in the database)
- Input an EPPO Code to get the categorization (when additional information on this pest is available in the database)

Please note that the last three functions search for data beyond the EPPO coding system itself (Codes/names/taxonomy) and can provide additional information for pests of regulatory interest that are documented in the EPPO Global Database. With these functions and for this limited number of pests, you can obtain their lists of host plants, the main category (e.g. insect, fungi, bacteria) to which they belong, and their phytosanitary categorization (e.g. quarantine pests listed by various countries or recommended for regulation by EPPO and other RPPOs).

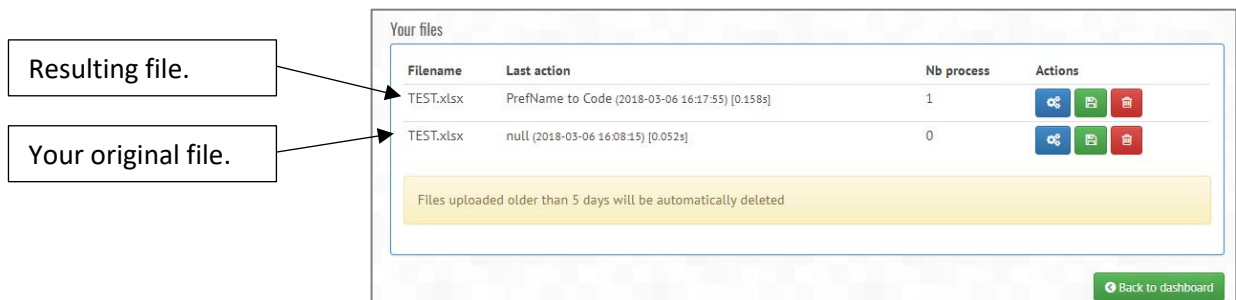

Upload your Excel file here (drag and drop in this blue box or click on it to open your file manager).

- Select the worksheet.
- Select the input column.
- Select the output column (a new column or an existing one).
- Select the function.
- Click on the blue button.

You will then be able to see your original Excel file and a new Excel file which will contain the results of your query:

Resulting file.

Your original file.

- Apply function 
- Download file 
- Delete file 

Example of a batch query using an Excel file (here a simple file with 2 columns: 'Any other data' and 'Names' and 15 lines, but your file can contain as many columns/lines as you wish) and the function: input a list of scientific names to get EPPO Codes.

1	Any other data	Names	EPPOCode
2	XXX	Aculops fuchsiae	ACUPFU
3	XXX	Eotetranychus lewisi	EOTELE
4	XXX	Eutetranychus orientalis	EUTEOR
5	XXX	Oligonychus perditus	OLIGPD
6	XXX	Acidovorax citrulli	PSDMAC
7	XXX	Burkholderia caryophylli	PSDMCA
8	XXX	Clavibacter michiganensis subsp. insidiosus	CORBIN
9	XXX	Clavibacter michiganensis subsp. michiganensis	CORBMI
10	XXX	Clavibacter michiganensis subsp. sepedonicus	CORBSE
11	XXX	Coconut lethal yellowing phytoplasma	PHYP56
12	XXX	Curtobacterium flaccumfaciens pv. flaccumfaciens	CORBFL
13	XXX	Dickeya chrysanthemi	ERWICH
14	XXX	Dickeya dianthicola	ERWICD
15	XXX	Erwinia amylovora	ERWIAM

New column containing the results of the query (in this example: get EPPO Codes).

You can apply several functions in a successive way to your Excel file. In the example below, another function 'Input an EPPO Code to get the main category' to the file obtained after our first query above (get an EPPO Code) has been applied.

Second query results (main category).

First query results (EPPO Codes).

Original file.

Your files

Filename	Last action	Nb process	Actions

13	XXX	Dickeya chrysanthemi	ERWICH	Bacteria
14	XXX	Dickeya dianthicola	ERWICD	Bacteria
15	XXX	Erwinia amylovora	ERWIAM	Bacteria

New column containing the results of the query (in this example: get main category).

For some functions, you will be asked to select options on the type of outputs you prefer

Options for synonyms/common names: you can select the language and the type of separator (linebreak, ; , |) to be used in the resulting Excel file (as there may be several synonyms or common names given to a single organism).

1	Any other data	Names	EPPOCode	Synonyms_en
2	XXX	Aculops fuchsiae	ACUPFU	fuchsia gall mite
3	XXX	Eotetranychus lewisi	EOTELE	Lewis spider mite
4	XXX	Eutetranychus orientalis	EUTEOR	citrus brown mite;citrus mite;lowveld citrus mite;oriental mite;oriental red mite;oriental spider mite
5	XXX	Oligonychus perditus	OLIGPD	
6	XXX	Acidovorax citrulli	PSDMAC	
7	XXX	Burkholderia caryophylli	PSDMCA	bacterial stem crack of carnation;bacterial wilt of carnation
8	XXX	Clavibacter michiganensis subsp. insidiosus	CORBIN	bacterial blight of lucerne;bacterial root rot of lucerne;bacterial wilt of lucerne;vascular wilt of lucerne
9	XXX	Clavibacter michiganensis subsp. michiganensis	CORBMI	bacterial canker of tomato;bird's eye of tomato fruits;vascular wilt of tomato
10	XXX	Clavibacter michiganensis subsp. sepedonicus	CORBSE	bacterial ring rot of potato;ring rot of potato;vascular wilt of potato
11	XXX	Coconut lethal yellowing phytoplasma	PHYP56	bronze leaf wilt of coconut;lethal yellowing of coconut
12	XXX	Curtobacterium flaccumfaciens pv. flaccumfaciens	CORBFL	bacterial tan spot of bean;bacterial tan spot of soybean;bacterial wilt of bean;vascular wilt of bean
13	XXX	Dickeya chrysanthemi	ERWICH	bacterial wilt of ornamentals
14	XXX	Dickeya dianthicola	ERWICD	bacterial stunt of carnation;bacterial wilt of carnation;bacterial wilt of dahlia;blackleg of potato;slow wilt of carnation
15	XXX	Erwinia amylovora	ERWIAM	fireblight;fire blight;twig blight of apple

In the example above, the options: common names in English, separated by a semicolon (;) have been selected.

Options for taxonomy, you can choose the output column to display either:

- Preferred names only
- EPPO Codes only
- Preferred names + EPPO Codes

1	Any other data	Names	EPPOCode	Kingdom	Phylum	Subphylum	Class	Subclass	Order	Suborder	Family	Subfamily	Genus	Species
2	XXX	Aculops fuchsiae	ACUPFU	Animalia	Arthropoda	Chelicerata	Arachnida		Acarida		Eriophyidae		Aculops	Aculops fuchsiae
3	XXX	Eotetranychus lewisi	EOTELE	Animalia	Arthropoda	Chelicerata	Arachnida		Acarida		Tetranychidae		Eotetranychus	Eotetranychus lewisi
4	XXX	Eutetranychus orientalis	EUTEOR	Animalia	Arthropoda	Chelicerata	Arachnida		Acarida		Tetranychidae		Eutetranychus	Eutetranychus orientalis
5	XXX	Oligonychus perditus	OLIGPD	Animalia	Arthropoda	Chelicerata	Arachnida		Acarida		Tetranychidae		Oligonychus	Oligonychus perditus
6	XXX	Acidovorax citrulli	PSDMAC	Bacteria	Proteobacteria		Betaproteobacteria		Burkholderiales		Comamonadaceae		Acidovorax	Acidovorax citrulli
7	XXX	Burkholderia caryophylli	PSDMCA	Bacteria	Proteobacteria		Betaproteobacteria		Burkholderiales		Burkholderiaceae		Burkholderia	Burkholderia caryophylli
8	XXX	Clavibacter michiganensis subsp. insidiosus	CORBIN	Bacteria			Actinobacteria		Actinomycetales		Microbacteriaceae		Clavibacter	Clavibacter michiganensis subsp. insidiosus
9	XXX	Clavibacter michiganensis subsp. michiganensis	CORBMI	Bacteria			Actinobacteria		Actinomycetales		Microbacteriaceae		Clavibacter	Clavibacter michiganensis subsp. michiganensis
10	XXX	Clavibacter michiganensis subsp. sepedonicus	CORBSE	Bacteria			Actinobacteria		Actinomycetales		Microbacteriaceae		Clavibacter	Clavibacter michiganensis subsp. sepedonicus
11	XXX	Coconut lethal yellowing phytoplasma	PHYP56	Bacteria	Tenericutes		Molluscutes		Achleplasmatales		Achleplasmataceae		Phytoplasma	Coconut lethal yellowing phytoplasma
12	XXX	Flaccumfaciens	CORBFL	Bacteria			Actinobacteria		Actinomycetales		Microbacteriaceae		Curtobacterium	Curtobacterium flaccumfaciens pv. flaccumfaciens
13	XXX	Dickeya chrysanthemi	ERWICH	Bacteria	Proteobacteria		Gammaproteobacteria		Enterobacteriales		Enterobacteriaceae		Dickeya	Dickeya chrysanthemi
14	XXX	Dickeya dianthicola	ERWICD	Bacteria	Proteobacteria		Gammaproteobacteria		Enterobacteriales		Enterobacteriaceae		Dickeya	Dickeya dianthicola
15	XXX	Erwinia amylovora	ERWIAM	Bacteria	Proteobacteria		Gammaproteobacteria		Enterobacteriales		Enterobacteriaceae		Erwinia	Erwinia amylovora

In the example above, the option 'preferred name' has been selected.

Options for host plants, you can choose the output column to display either:

- Preferred names only
- EPPO Codes only

As for some pests, the EPPO Global Database may provide an estimate of the importance of their host plants (i.e. indicate whether they are major, minor, incidental ...), this data can also be retrieved.

1	Any other data	Names	EPPOCode	Hosts
2	XXX	Aculops fuchsiae	ACUPFU	Fuchsia hybrids (Major); Fuchsia (Minor); Fuchsia magellanica (Minor)
3	XXX	Eotetranychus lewisi	EOTELE	Euphorbia pulcherrima (Major); Carica papaya (Minor); Citrus (Minor); Citrus limon (Minor); Citrus sinensis (Minor); Euphorbia mar
4	XXX	Eutetranychus orientalis	EUTEOR	Citrus limon (Major); Citrus reticulata (Major); Citrus sinensis (Major); Citroncirus (Minor); Citrus (Minor); Citrus paradisi (Minor); F
5	XXX	Oligonychus perditus	OLIGPD	Chamaecyparis pisifera (Major); Juniperus chinensis (Major); Platycladus orientalis (Major); Chamaecyparis (Minor); Cryptomeria j
6	XXX	Acidovorax citrulli	PSDMAC	Citrullus lanatus (Major); Cucumis melo (Major); Cucumis sativus (Minor); Cucurbita moschata (Minor); Cucurbita pepo (Minor); Pi
7	XXX	Burkholderia caryophylli	PSDMCA	Dianthus caryophyllus (Major); Dianthus (Minor); Dianthus allwoodii hybrids (Minor); Dianthus barbatus (Minor); Limonium sinuat
8	XXX	Clavibacter michiganensis subsp. insidiosus	CORBIN	Medicago sativa (Major); Medicago (Minor); Medicago falcata (Minor); Melilotus albus (Minor)
9	XXX	Clavibacter michiganensis subsp. michiganensis	CORBMI	Solanum lycopersicum (Major); Lycopersicon (Minor); Phaseolus vulgaris (Incidental); Pisum sativum (Incidental); Zea mays (Incid
10	XXX	Clavibacter michiganensis subsp. sepedonicus	CORBSE	Solanum tuberosum (Major); Beta vulgaris (Incidental); Solanum lycopersicum (Incidental); Solanum melongena (Artificial)
11	XXX	Coconut lethal yellowing phytoplasma	PHYP56	Cocos nucifera (Major); Areaceae (Minor); Cocos (Minor); Phoenix (Minor); Phoenix canariensis (Minor); Phoenix dactylifera (Min
12	XXX	Curtobacterium flaccumfaciens pv. flaccumfaciens	CORBFL	Phaseolus vulgaris (Major); Dolichos (Minor); Glycine max (Minor); Phaseolus (Minor); Lablab purpureus (Incidental); Phaseolus cc
13	XXX	Dickeya chrysanthemi	ERWICH	Dendranthema x grandiflorum (Major); Dianthus caryophyllus (Major); Dahlia hybrids (Minor); Dianthus (Minor); Dieffenbachia me
14	XXX	Dickeya dianthicola	ERWICD	
15	XXX	Erwinia amylovora	ERWIAM	Cotoneaster bullatus (Major); Cotoneaster dammeri (Major); Cotoneaster lacteus (Major); Cotoneaster lucidus (Major); Cotoneast

In the example above, the options ‘preferred name’ and ‘indicate host plant classification’ have been selected.

Options for the categorization of pests: you can select individual countries (to view national quarantine lists), EU (to view EU regulated pests), EPPO (to view EPPO listed pests), or all (e.g. to view all categorizations contained in the EPPO Global Database).

1	Any other data	Names	EPPOCode	Main category	Categorization EPPO
2	XXX	Aculops fuchsiae	ACUPFU	Acari	A2 list
3	XXX	Eotetranychus lewisi	EOTELE	Acari	
4	XXX	Eutetranychus orientalis	EUTEOR	Acari	A2 list
5	XXX	Oligonychus perditus	OLIGPD	Acari	A1 list
6	XXX	Acidovorax citrulli	PSDMAC	Bacteria	A1 list
7	XXX	Burkholderia caryophylli	PSDMCA	Bacteria	A2 list
8	XXX	Clavibacter michiganensis subsp. insidiosus	CORBIN	Bacteria	A2 list
9	XXX	Clavibacter michiganensis subsp. michiganensis	CORBMI	Bacteria	A2 list
10	XXX	Clavibacter michiganensis subsp. sepedonicus	CORBSE	Bacteria	A2 list
11	XXX	Coconut lethal yellowing phytoplasma	PHYP56	Bacteria	A1 list
12	XXX	Curtobacterium flaccumfaciens pv. flaccumfaciens	CORBFL	Bacteria	A2 list
13	XXX	Dickeya chrysanthemi	ERWICH	Bacteria	
14	XXX	Dickeya dianthicola	ERWICD	Bacteria	A2 list
15	XXX	Erwinia amylovora	ERWIAM	Bacteria	A2 list

In the example above, the option ‘EPPO’ in the list has been selected. Therefore, the resulting file indicates in which EPPO List (e.g. EPPO A1 and A2 lists of pests recommended for regulation as quarantine pests) the pest concerned is included.

To select a country, several countries or international bodies (i.e. EPPO, EU), click in the white box.

You can add as many items as you wish by clicking on the white box again.

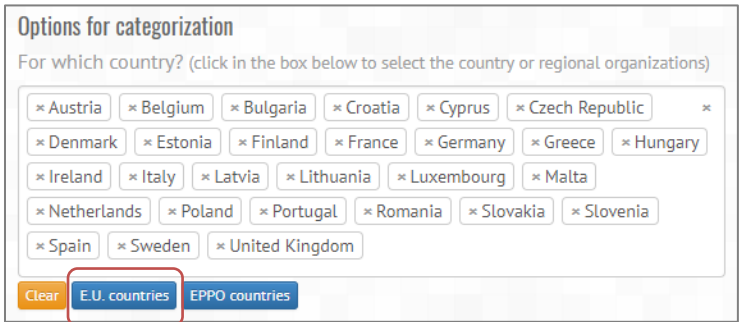

To remove a selected item, click on the cross.

The button clear will remove all selected items.

The blue buttons 'E.U. countries' and 'EPPO countries' will allow you to select in one click, all EU members states and all EPPO member countries, respectively.

In the example above, the button 'E.U. countries' has been selected.
